

### TWIN-WALL POLYCARBONATE FOR AISLE CONTAINMENT SYSTEMS

#### Efficient • Durable • Cost-Effective

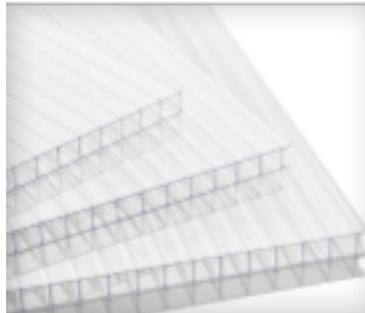

- TS ContainShield™ panels provide a high-performance solution for hot and cold aisle containment in data centers and server farms.
- Engineered for superior airflow management, these lightweight yet exceptionally durable panels improve energy efficiency while maintaining excellent visibility and safety.

#### KEY BENEFITS

- Energy Efficient: Boosts cooling performance and lowers operating costs.
- High Impact Strength: Withstands the demanding conditions of modern data centers.
- Lightweight Design: Makes installation, removal, and maintenance fast and hassle-free.
- Translucent Clarity: Allows natural light transmission for bright, safe, and secure aisles.
- Cost-Effective: A smart alternative to glass and other solid panel materials.
- Versatile Application: Ideal for both hot and cold aisle containment partitions.

#### WHY CHOOSE TS CONTAINSHIELD™

- Reduces overall system weight and structural load
- Enhances airflow management and thermal efficiency
- Provides long-lasting performance with minimal maintenance requirements

**TRENCHSAFE DELIVERS NEXT-GENERATION PLASTIC SOLUTIONS  
DESIGNED FOR THE UNIQUE DEMANDS OF TODAY'S DATA CENTERS.  
TRUST OUR EXPERTISE TO HELP YOU BUILD SAFER, MORE EFFICIENT,  
AND FUTURE-READY FACILITIES.**

## TS CONTAINSHIELD™

Smart Containment • Superior Efficiency.
